

Exbander Precision EP6000

Consolidated network traffic optimisation, reporting and management solution for medium and large size organisations.

front profile

back profile

"images for illustrative purposes only"

In a converging world with more distributed networks and workforces, the traffic converging across networks is growing exponentially every year. This extra traffic results in increasingly greater demands on corporate networks and a need to derive flexibility and consistency from the performance of the network.

With many staff now being based remotely, and increasing amounts becoming entirely mobile thanks to the availability of wireless networks, wireless broadband and IP mobile phone services, corporate networks have become more distributed.

To achieve reduced network operating costs and better control and security of data that travels across networks, there is ever increasing pressure for organisations to look at better ways to manage their networks.

The EP6000 gives IT staff the most comprehensive and effective real-time solutions to report, manage and control their LAN/WAN traffic, enabling faster and higher availability of internet connections by dynamically reducing congestion between applications. The unique combination of traffic shaping, load balancing, WAN acceleration, routing and analysis and reporting in a single device sets the EP6000 as leader in its field.

- » **Quick and easy to deploy**
- » **Targets bandwidth so network resources are delivered to business critical events and the devices that deliver those services and applications**
- » **Protects business operations from the common but random network events that are normally unmanaged**
- » **Increases efficiency by guaranteeing fast access to key resources**
- » **128,000 concurrent IP flows**
- » **Throughput up to 100 Mb/s**
- » **Acceleration via optional upgrade modules**

**October 2007
What "Broadband Testing" said about the EP6000**

"Over the years Broadband-Testing has discovered many excellent products and truly innovative technologies. Yet none can compare with the data acceleration technology leap we uncovered with DBAM's latest product release and the astonishing file transfer results we obtained. Forget what you already know, this is truly ground breaking technology; a case of tearing up the rulebook and starting out anew. In the same way that the combination of Internet and email revolutionised many people's lives, so can this."*

*data acceleration (part code WFS6000) is an optional module.

Product Sheet

Specification - EP6000

CORE MODULE	DESCRIPTION
WAN Capacity - Total Throughput (in & out)	45Mb/s (option to 100Mb/s)
Profile	1U
Optimised TCP Connections	1,000
IP Flows	128,000
Shaping Policies	8,192
Bandwidth Management	Yes
Compression	Yes
Data Reduction	Yes
Acceleration	TCP & CIFS
QoS	Yes
Failover	Yes
Load Balancing	Yes
Routing	Yes
Analysis & Reporting	Yes
Data Store Capacity	80GB
LCD & keypad	Yes
Precision Start Configuration & Management Suite	Yes

PHYSICAL SPECIFICATION	
Power	220w
VA	Dual 110-240v AC
Temperature	5 - 40°C (67-130°F)
Relative Humidity	20% to 90% RH
System Dimensions	42.9(W) x 36.0(D) x 4.4(H)cm
Packaging Dimensions	58cm(W) x 63cm (D) x 22cm (H)
Gross Weight	9.8kgs (21.59 lbs)

Ordering Information - EP Devices & Licences

PRODUCT NAME	DESCRIPTION	PARTCODE	RRP
EP6000 Chassis	EP6000 Chassis including 45Mb/s Throughput License (Software License Sold Separately)	EP6000	£9,999.00
Unless opting for a Silver or Gold Support Package, you must add a Software License to your EP6000 order:			
Software License EP6000	Basic 12 month Software License for EP6000 <i>(If a Silver or Gold Support Package is purchased, this is not required)</i>	EP6000SL	£750.00
Choose to upgrade from the 45Mb/s Throughput License included as standard by adding the option below:			
Throughput License(100)	Upgrade to 100Mb/s Throughput License for EP6000	100MbWALIC	£2,999.00
Choose a support package if required from the options below:			
Silver Support EP6000(45)	12 month Silver Support Package for EP6000 with 45Mb/s Throughput <i>Including FREE 12 month Software License</i>	SISUP-45-0000	£2,499.00
Silver Support EP6000(100)	12 month Silver Support Package for EP6000 with 100Mb/s Throughput <i>Including FREE 12 month Software License</i>	SISUP-100-0000	£3,499.00
Gold Support EP6000(45)	12 month Gold Support Package for EP6000 with 45Mb/s Throughput <i>Including FREE 12 month Software License</i>	GOSUP-45-0000	£2,999.00
Gold Support EP6000(100)	12 month Gold Support Package for EP6000 with 100Mb/s Throughput <i>Including FREE 12 month Software License</i>	GOSUP-100-0000	£3,999.00
Choose to extend the Hardware Warranty from 12 Months to 36 Months by adding the option below to your EP6000 order:			
Extended Warranty EP6000	Hardware Warranty Extension for EP6000 from 12 to 36 Months	EXTWARREP6000	£2,999.00

Ordering Information - Software Modules

PRODUCT NAME	DESCRIPTION	PARTCODE	RRP
IMView	IMView Software Module for the EP6000	IMV6000	£1,200.00
VoIPView	VoIPView Software Module for the EP6000	VOV6000	£5,000.00
Loss Mitigation	Loss Mitigation Module for the EP6000 NEW	LOMIT6000	£5,999.00
WFS	Windows File Sharing Acceleration Module NEW	WFS6000	£3,999.00

Ordering Information - Redundant Units

PRODUCT NAME	DESCRIPTION	PARTCODE	RRP
EP6000(45)	EP6000(45) Redundant Unit	SBEP600	£9,999.00
EP6000(100)	EP6000(100) Redundant Unit	SBEP6000	£12,998.00
